North Carolina Indian Casinos

Cherokee, Harrah's open casino

11-14-97

CHEROKEE, N.C. — Memphis, Tenn.-based Harrah's Entertainment Inc. and the Eastern Band of Cherokee Indians have opened an \$82 million casino entertainment complex in Cherokee, N.C.

Harrah's, which operates hotel-casinos in Reno and Lake Tahoe, said Thursday that the Harrah's Cherokee Smoky Mountains Casino, which features a Native American and mountain lodge theme, is expected to generate about 1,100 jobs. It's the only facility of its kind between Tunica, Miss., and Atlantic City, N.J., the company said.

Additionally, Harrah's said that 16 million people live within 200 miles of the new casino, which is located adjacent to the Great Smoky Mountains National Park.

The 175,000-square-foot casino is the third tribal-owned gaming facility managed by Harrah's. It operates 14 casinos in nine states.

Subject: ONEIDA UPDATE

To: TQHB91A Gerald O'neal Date: 5/1/96
From: HUAC35A Pete Porro Time: 7:36PM ET

As I mentioned, I UV'ed, looked under a magnifying glass, and didn't see anything different between the old 50 cent BJ Oneida Casino and the new looking ones. Well I was was just putting them into the stock box and though I should take one more look. Guess what, those little Wascals pulled a switch and they are different. I just had a new one in the book already. I'll send yours out tomorrow.

Want to guess what's different? <G>

I went through and found two different mold designs for this common Bud Jones mold. I'm entering this as a new discovery, but knowing how many details slip past my fuzzy eyes, it may be nothing new. Looked in the Herz book, the Bud Jones pages (page 31) 6SO mold. And for those of you who don't have pictures to look at, the Casino Omaha \$1 is the same mold. Couldn't find a Nevada chip in my collection with this mold. It's like a die4suit but instead of the two sets of dice it has the Club and Spade repeated.
|diamond|club|spade|heart|spade|club|

OK here's the catch. The diamond is different. All the others, 6SO and Die4suit have the left side of the diamond slightly higher than the right and the diamond on the new design is about 1/2 a millimeter smaller measuring across the long sides. (open for discussion, may be an optical illusion?)

I'll scan the two chips side by side and e-mail them to Michael tomorrow. Hopefully I can get good enough definition so you can see what I am talking about.

Now I don't really expect that BJ made these special, so it's time for everyone to look at their newer 6SO mold chips and see if you have the old mold or the new version 6SO2 mold? (or is it a 6SOV2?)
